In the evolving landscapes of didactics and linguistics, the cornerstone of groundbreaking research lies in the meticulous design and execution of the methodology. It is with great enthusiasm that we announce a dedicated Study Day on Dissertation Methodology in Didactics & Linguistics, to be held on the 30th of May, 2024. This scholarly event seeks to illuminate the path for emerging researchers, guiding them through the intricate maze of constructing robust research questions, selecting appropriate methodologies, employing effective data collection tools, navigating through data analysis procedures, and articulating findings with precision. Moreover, this congregation will address the pivotal legal and ethical considerations intrinsic to scholarly research, culminating in the preparation for the rigorous defense of the viva.

Our aim is to foster a dynamic forum for academic discourse, encouraging participants to share innovative ideas, explore diverse methodologies, and engage in critical discussions that will refine their research endeavors. This study day promises to be a beacon for those embarked on the scholarly quest of contributing to the rich tapestries of didactics and linguistics.
